

An Introduction to the Offshore Upstream Oil and Gas Industry

2 Day Course

Course Code: 1392/BI

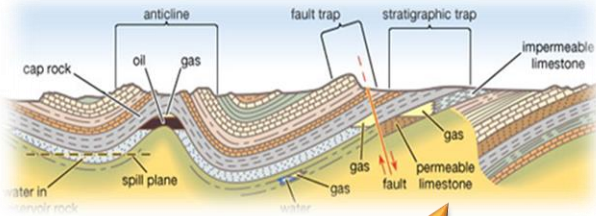

Who Should Attend:

This course is extremely popular with personnel looking to gain an understanding of the Offshore Oil and Gas Industry – government agencies, authorities, operators, contractors and service companies. It is especially valuable for newcomers to the industry and non-technical personnel working in areas like HR, finance, IT, contracts and administration who feel they could benefit from gaining a wider appreciation of the “big picture”.

What You Will Learn:

This wide-ranging and practical industry overview covers each key phase of the offshore exploration and production industry. It offers non technical personnel the opportunity to gain an understanding of the industry fundamentals.

What You Will Learn :

- The scientific origins of oil and gas
- The fundamentals of hydrocarbon exploration and development
- Oil and gas terminology
- Offshore drilling and well fundamentals
- The technical process of exploration
- The technical process of production
- The safety consideration

Only 999 RM
for 2 days
 (inclusive of lunch)

THE OIL & GAS VOCATIONAL TRAINING SPECIALISTS

Course Content:

The Formation of Hydrocarbon Deposits

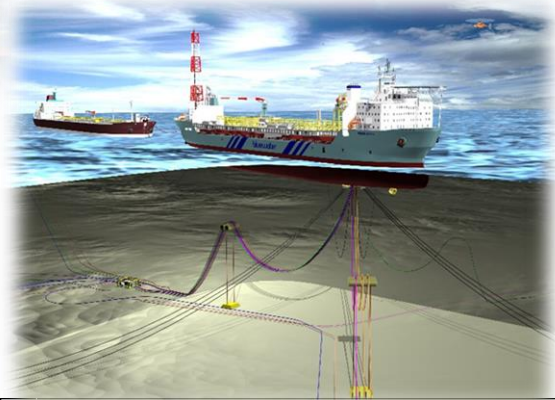

- 1 • An introduction to Oil and Gas traps
- 2 • Oil and Gas Fields
- 3 • Hydrocarbon Reservoirs

Oil and Gas Markets and Exploration

- 1 • An introduction to Oil and Gas Processes & Markets
- 2 • Exploration Methods
- 3 • Seismic Techniques
- 4 • Seismic Maps / 2-D; 3-D and 4-D Studies
- 5 • Exploration Technology
- 6 • Oil & Gas Units

Drilling for Hydrocarbons

- 1 • An Introduction to Hydrocarbon Drilling Technology
- 2 • Drilling Methods and Rigs
- 3 • Vertical, Directional, Multi-lateral, Gas Well Drilling

The Hydrocarbon Well

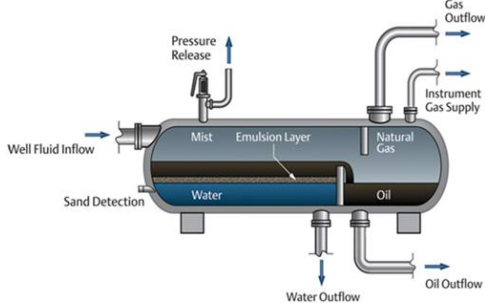

- 1 • Completion Fluid
- 2 • Wellhead Assembly (x-mass tree)
- 3 • Wellhead Control / Testing

Offshore Platforms & Production Systems

- 1 • Offshore Production Systems
- 2 • Production Platforms
- 3 • Floating Production and Offloading Systems

Safety in the Oil and Gas Industry

- 1 • Safety Overview
- 2 • Safe Systems of Work
- 3 • Golden Rules
- 5 • Mandatory Training - Transportation and Evacuation

Course Delivery:

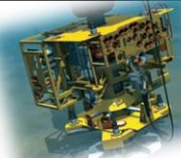

Using the latest western communication training techniques from a highly experience Industry Specialist Instructor. Highly Interactive and where possible involving Individual and Team Work, Role plays, Realistic Tasks, Self Evaluation, Professional Performance Evaluation.

Instructor:

Highly qualified knowledgeable graduate instructor with extensive industrial experience.

Course Duration:

2 days

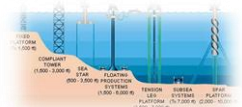

Group Size (Participants):

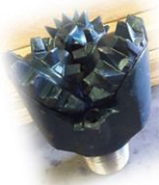

The class will commence with 15 delegates and will have a maximum of 25 delegates

Location:

Offered at; Local 5 star Hotel, Convension Centre, University Campus or at your Company

To register or for more information on the next scheduled course please contact: courses@wazp-gr.com

Suggested follow-on Courses:

- An Introduction to Onshore upstream Oil and Gas Processing
- An Introduction to Floating Production and Storage and Offloading (FPSO) Assets
- An Introduction to Liquefied Natural Gas (LNG) Assets
